WELCOME TO THE 36th ANNUAL MILLAH MURRAH ANGUS BULL SALE

Our belief has always been that the dam drives at least half the genetic equation, when considering the value proposition of a new herd bull. To highlight the maternal input, and the genetic depth behind the bulls, we have redesigned the catalogue this year, to show five generations on the bottom side of each bulls' pedigree.

Like the previous generation, we always put phenotype first in our joining selections. That policy has never changed over the 55-year duration of the stud's existence. The cattle are heavier these days, but the overall type hasn't changed. We strive to breed cattle that are three dimensional in build - long, deep and wide. We emphasize rapid early life weight gain, easing into a moderate maturity pattern. We seek animals with visual carcass expression, fill behind the shoulder and along the spine, with depth right down through rounded hams. And we value easy finishing ability as indicated by the skin and hair type.

These traits are abundantly clear to see, right through the draft of bulls in this catalogue.

As outlined in our presale letter, we have had wonderful feedback from our clients over the past 12 months. More than ever, the market is differentiating strongly on bloodlines. Results on A+ and through the sale yards, show big premiums for quality cattle, sired by registered Angus bulls from recognized seedstock programmes.

In line with this, we have introduced a branding schedule (shown below) to support our clients at point of sale. Just as importantly,

for buyer confidence, is to endorse cattle that are genuinely Millah Murrah blood. We want the premiums to go where they should, and that is to the people who invest in our genetics.

Readers will note some “traits observed” missing for the true yearling bulls at Lots 81-118. 200 & 400 day weights, docility scores, scrotal measurements and scan data have all been submitted. For those wishing to see up to the minute EBV predictions, this information is included in the August TACE analysis. We note that there weren't any major changes.

Dimity and I bid farewell to Kevin Betts late last year after 20 years' wonderful service. Kevin was the catalyst for so much change and improvement to our farm and our lives. Duncan Ferguson took over the reins on his departure, having worked here as a contractor for several years. The quality of Duncan's work, his wonderful manner and enthusiasm for the role inspires everyone.

We pay our respects to the family of Stephen Smith. Steve ran the Stud Stock business Dick Smith Transport in Dubbo. He was a wonderful professional, and a good friend to Dimity and me. Steve is a huge loss to the industry.

It is an extraordinarily consistent run of bulls this year. Please take time to inspect the final pen of the sale. And if you can, at the end of the sale we would be glad if you could stay a while, for a drink and something to eat.

ROSS & DIMITY THOMPSON, TRENT WALKER AND FAMILIES

Sale Bulls

MM Story

36th ANNUAL BULL SALE

at "Goonamurrah", 1202 Turondale Road, Bathurst
Thursday, 5th September 2024 at 1.00pm
(NB from 12.45pm bulls will be moving to the pen up yards)

135 Registered Bulls

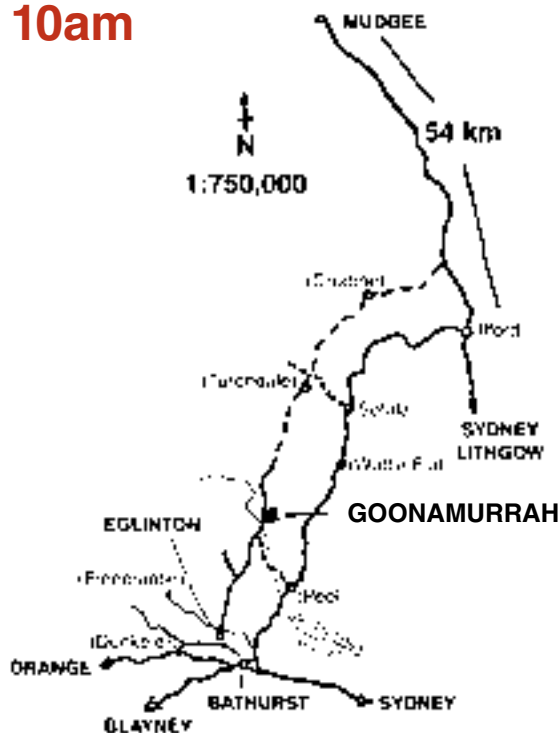

Inspection from 10am

COMING FROM BATHURST

Follow Durham Street, past All Saints College, to Eglinton. From Eglinton, take the Hill End via Turondale Road, for 20 km, "Goonamurrah" is well signed on the right hand side.

COMING FROM MUDGEES

Take the Sydney Road. At Ilford turn right on the Bathurst road. About 28kms from Ilford you will cross the Turon River at Sofala. Once over the bridge, take the road to the right towards Hill End. Follow this winding sealed road until you come to an old tin shed on your left and a left turn to Bathurst. Travel about 25kms along this road towards Bathurst. You will cross Millah Murrah creek and about three kms later, "Goonamurrah" is on the left hand side.

FREE FREIGHT - see page 2 for details.

MILLAH MURRAH ANGUS

SALE VENUE

Selling will commence at 1.00pm on Thursday, 5th September 2024. Limited undercover seating is provided. **PLEASE BE SURE TO BRING CLOTHING FOR COLD & INCLEMENT WEATHER.** Sale cattle may be inspected from 10am on the morning of the sale.

SELLING SYSTEM

Sale of animals will be conducted under normal auction conditions using the bid card system of identification. Buyers must register with the selling agents prior to sale commencement to obtain a bid card. This can be done at the venue, or by [pre-registering online at www.millahmurrah.com](http://www.millahmurrah.com) or as outlined on page 97 of the catalogue. All bulls are sold **exclusive** of GST. Successful purchasers are requested to give **written** bull transport instructions to the selling agents at the conclusion of the sale.

ONLINE BIDDING

The sale will be livestreamed through two platforms, Auctionsplus and Stocklive. See pages 6 & 7 for details on how to register for online bidding.

PHONE BIDDING

Mobile service is strong at the venue. Selling agents' phone numbers are listed on page 1 of the catalogue. Other contact numbers are:

Ross Thompson 0439 179 269
Dimity Thompson 0422 288 325
Jane Thompson 0428 375 702
Trent Walker 0429 965 167

FREE FREIGHT

Millah Murrah will provide free freight on all purchases of \$10,000 or more:

- to the local centres of Bathurst, Orange, Oberon, Mudgee, CTLX & surrounds
- to the major centres of Dubbo, Roma, Tamworth, Moree, Albury & Melbourne

Bulls will be delivered as soon as possible following the sale. Any bulls left at "Goonamurrah" beyond one week, post-sale will be ineligible for the free freight service, unless alternate arrangements have been made with the vendor.

This service is only available if co-ordinated through Dick Smith Transport Dubbo (0448 822 622) for long haul freight, or Allen Markwick (0429 319 219) for local areas.

Onward freight arrangements from the major centres or intermediary points will be the buyer's responsibility. However, where possible, we will endeavour to deliver direct to farm.

This service cannot be guaranteed for buyers who contract for freight with other carriers.

Representatives of both companies will attend the sale to help co-ordinate delivery of bulls with the Agents.

INSURANCE

We highly recommend you insure your bulls with your usual Insurance firm immediately. Agents' representative will also be available at the sale venue to assist with insurance if required.

REGISTRATION TRANSFER OF BULLS

Ownership transfer of the bulls will be registered by the vendors with Angus Australia, provided accurate transferee details are supplied with the Buyer's Instruction Form.

CATERING

Complimentary lunch is provided as well as post sale nourishment. All meat is the product of the Alexander Downs Group, owned by Robert Gill & family at Merriwa.

PHYSICAL EXAMINATION & SEMEN TESTING OF BULLS + JOINING SEASON MANAGEMENT

Bulls are vet checked by Chris Hallett of Coolah Vet Clinic, including penis examination, palpation of reproductive organs and visual inspection of structure and locomotion.

At the same time, a crush side test for semen motility is conducted.

A semen sample is then sent to the Queensland Sperm Morphology Laboratory for analysis.

All bulls in the 18 month and two-year categories have presented greater than 70% normal sperm, except when noted on the supplementary information sheet, provided on sale day.

For the yearlings, the satisfactory morphology threshold is lowered, simply due to maturity. Yearling bulls presenting 50-70% normal sperm, and showing adequate rates of improvement from multiple tests, will be included in the sale

MILLAH MURRAH ANGUS

with their % normal sperm indicated on the supplementary sheet. It is important to note that they are considered ready for work at point of sale.

As in previous years, there will be some yearlings for whom it is not possible to obtain a satisfactory semen sample ahead of the sale. While it is unlikely that they are infertile, we prefer to be sure, before delivering them to their new home. And rather than withdraw them from sale, we sell them with the following options available to the purchaser:

1. Free delivery guaranteed by October 20th, pending a satisfactory semen test result, with no payment due until this time or,
2. In the event the bull fails the retest, the buyer may,
 - (a) withdraw from the sale altogether,
 - (b) retain the option to purchase the bull pending a satisfactory result at an agreed future date, or
 - (c) elect to take a satisfactory replacement, delivered free of charge by October 20th, with price negotiated privately, no higher than the auction price of the original bull.

The sale supplementary sheet will clearly identify any bulls presented for sale under these delayed terms.

COMMENT: Some studs do not conduct any form of semen testing, and many do not carry out morphology analyses, even for two-year-old sale bulls. Morphology analysis of genuine yearling bulls is rare. Semen testing is a vexed area, and we make no judgement on what another stud does in that regard. The reason some studs, including Millah Murrah, choose to undertake semen morphology testing is that, very occasionally, it will identify a permanent issue that cannot be found by a thorough vet examination or crush side testing.

It is important to understand that semen testing is not a “silver bullet” guarantee of the long-term fertility or infertility of a bull. It is no more than a “point in time” examination. Testing six weeks apart, invariably reveals failed bulls that pass and passed bulls that fail.

Above all, during mating season, be sure to check the bulls properly each week at least. And in single sire situations, always endeavor to rotate the bulls between mobs midway through the season.

BE SURE OF WHAT YOU ARE BUYING

All animals have been DNA verified to the sire at least and in most cases to the dam as well. We have been sire or parent

verifying every animal in the Millah Murrah female herd since 2003. No one has disputed our claim that Millah Murrah is the longest parent verified herd in the world.

The suffix displayed at the end of each animal's name indicates the DNA parentage verification that has been conducted by Angus Australia.

PV : both parents have been verified by DNA

SV : the sire has been verified by DNA

DV : the dam has been verified by DNA

: DNA verification has not been conducted

E : DNA verification has identified that the sire and/or dam may possibly be incorrect, but this cannot be confirmed conclusively.

YEARLING BULL SELECTION

The yearling bulls must be born early enough in the spring calving season to be 12 months of age by sale time.

At point of sale, we require them to be well over 500kg with minimum teste size of 33cm, more than the industry standard required for bulls of this age. This year's yearling draft are an exceptional set of bulls and will average close to 600kg at sale time, 30-40kg more than usual.

During the selection process we place a weighting towards bulls with strong calving ease credentials. Being the same age and not overly heavy, they are a logical match for joining heifers. However, with sound management, the yearling bulls do not need to be pigeon-holed as heifer bulls only. Many are sufficiently well grown to work over cows in their first season, especially 1st and 2nd calvers.

The yearlings continue to grow in popularity as breeders come to appreciate that, for a *tiny* bit of extra management, they deliver tremendous rewards in terms of more calves per lifetime and rapid genetic gain.

HEALTH TREATMENTS

The bulls are ready for immediate use. They have been treated as follows:

- DNA tested to prove they are not PI (Persistently Infected) with Pestivirus
- Double vaccinated with Pestigard (last treated June 10th 2024)
- Double vaccinated with Vibrovax (last treated June 10th 2024)
- Double vaccinated with Ultravac 7 in 1 (last treated June 10th 2024)
- Double vaccinated with Ultravac BEF for 3 day sickness (last treated June 10th 2024)
- Drenched with Eprinex in August

Please note that we will have Tick Fever vaccine delivered the day following the sale. Any animals requiring treatment for tick fever will be needled, upon request to Ross Thompson only, on Saturday 7th September. Providing full insurance is taken out, bulls can remain at Goonamurrah for up to two months at no additional charge and without voiding the free freight service.

MILLAH MURRAH ANGUS

JBAS

Under the Johnes Beef Assurance Score (JBAS) system, Millah Murrah Angus stud cattle carry the highest level of assurance possible, JBAS-8. Previously Millah Murrah has carried MN3 status since 2001. Our biosecurity programme is overseen by our veterinarian, Chris Hallett from Coolah Vet Clinic.

TEMPERAMENT

Ben Simpson offered the following observation:

"As a professional animal photographer, I place cattle under extraordinary temperament pressure. I have worked at close quarters with the Millah Murrah cattle for many years and rate it as one of the quietest, most even tempered herds of cattle I have dealt with in my career. They are a pleasure to work with."

We have screened the cattle rigorously for temperament since the Stud's inception in 1969. We know the temperament of the bulls in this sale individually and are confident that under normal circumstances each of them is of sound disposition. Understandably each year on sale day an occasional animal misbehaves due to the big change to the yard area and the pressure of strange people invading their space.

RECESSIVE GENETIC CONDITIONS

All bulls catalogued are free by pedigree or test of the four main identifiable genetic conditions. Their status is shown on the 2nd row of the Lot information. We believe our herd is free of the red gene however make no guarantee on this. No claim may be made against the vendor for any unknown or untestable conditions that may arise in future.

SEMEN RIGHTS

All bulls sell with 80% semen marketing rights attached. In doing this we leave the great majority of any potential semen revenue in the buyer's hands. However, by keeping a 20% share, it gives us, as the breeder and party with the greatest knowledge of the bull's background, a seat at the table, in any possible negotiations with semen companies and other parties. By keeping the vendor involved, the 80/20 semen ownership split is designed to give the purchaser the greatest opportunity for semen sales on the top sires in the sale. Should any purchaser wish to operate at the sale on the basis of 100% semen ownership, please contact the vendor at least 24 hours prior to the date of the sale. Under all circumstances, the vendors retain the right to collect 1000 straws from any bull in the sale for use in the Millah Murrah and Keringa herds only.

BULL HANDLING

On arrival at their new home it is important a suitable mob of animals is yarded to greet the bull and minimize the stress on the bull. Suitable animals include pregnant cows, steers, but certainly not other bulls.

We strongly urge breeders to rotate their bulls mid-season. No amount of vet checking, semen examination or paddock observation, will detect all cases of transient issues with bull semen. While it is rare, sometimes a bull looks to be doing everything right, but due to unknown stresses, as much

as three months prior to the date of service, conception is not achieved. The greatest insurance against low conception is to replace, or swap bulls around, at least three weeks before the end of the joining period.

The bulls are in good joining condition at point of sale, but it is imperative to ensure good nutrition for the bulls during the joining period. You should check the bulls regularly to see they are working, especially in the early stages of joining when the majority of problems occur and early intervention can minimize the damage to the bull and to conception rates.

When joining is complete, bulls should be drenched and placed on good pasture to get back into first grade health without being allowed to get over fat.

GUARANTEE

1. Every bull is guaranteed to be a breeder at the time of sale and is guaranteed fertile for 12 months from sale day. If a bull should prove infertile or unable to serve cows naturally (provided it is not caused by injury or disease contracted post sale), the purchase price of the bull, less salvage value, will be refunded. If a suitable replacement is available at the time, compensation can be arranged in this manner. Please note, to ensure a level playing for all bidders, we do not issue credits for use at future sales.
2. The bulls are guaranteed to be of the parentage catalogued. Any claim to the contrary must be lodged within six months of sale date, after which time the vendor's liability is absolved. Similar compensation is offered as in point 1.

HEALTH & SAFETY OF VISITORS TO OUR SALE (RULES & ADVICE)

All the sale bulls have been screened for temperament and are quiet to handle under normal circumstances. However there are inherent risks associated with cattle handling.

VISITORS ENTER THE CATTLE PENS AT THEIR OWN RISK CHILDREN MUST NOT ENTER THE YARDS

People entering the yards are at risk of injury. Be especially alert for bulls fighting and if one is playful with you, do not respond by patting his head. What a bull considers a playful nudge can break human legs! We do not expect the bulls to be aggressive with humans, but sale day places extraordinary pressure on them as they experience an entirely foreign environment. Remember the quietest bull is in fact an unpredictable animal.

Do not crowd the bulls or loiter inside the pens. We cannot cover every example of the dangers of cattle handling, so please use common sense and be alert at all times. Don't enter the pens unnecessarily.

Please call upon any of the Elders agents for an escort through the bulls if required. Please vacate each bull yard as swiftly as possible to reduce social contact in the pens.

KEY REFERENCE SIRES

MILLAH MURRAH PARATROOPER P15

The great sires outbreed themselves. In over 50 years of breeding, we have never had better results from one sire than Paratrooper. He has broken almost every record in the book for male and female progeny alike. The quality of his calves is now recognized globally, including strong semen demand from the US. Paratrooper will “fix” just about any phenotype, producing stellar results with females from any genetic background. Paratrooper has another outstanding group of bulls in this sale, several with genuine stud sire merit.

Paratrooper P15

MILLAH MURRAH REMBRANDT R48

Rembrandt R48 was pipped for the history books by a quirk of cataloguing. He fetched \$240,000 two Lots after Rocketman at our 2021 sale, to Woonallee Simmentals & JT Angus. Driven by his exemplary structure and phenotype, and the superb quality of his Kingdom-sired dam, semen demand has struggled to keep pace with supply. Breeders appreciate Rembrandt as a herd “fixer”. He will iron out any number of issues, be it breed character phenotype, foot and leg structure, or temperament, Rembrandt provides the answers.

Rembrandt R48

MILLAH MURRAH ROCKETMAN R38

At \$280,000, Rocketman topped our 2021 sale to Brooklana Angus, becoming the highest valued bull in Australian Angus history to that point. The Rocketman progeny are stunning, with unparalleled body mass and early life weight gain performance, on an excellent foot base. The oldest Rocketman daughters have just weaned their maiden calves, with outstanding weights among their contemporaries. The Rocketman sons are some of the best Angus bulls we have seen, with true stud sire prospects among them including Lot 23 & Lot 67.

Rocketman R38

MILLAH MURRAH RECTOR R53

The Rector progeny is super easy fleshing with exceptional top line strength and hind quarter expression. Purchased by Spring Waters and Twin Oaks Stud (NZ) in 2021, Rector is a Nectar son from an Ascot Hallmark sired dam. We have used him heavily by AI over several seasons and will continue to do so. Rector has a brilliant influence on structure. He transmits superb foot and leg quality and tremendous strength from the head right through to the excellent width of pin and flank depth his progeny display. The first daughters in production look absolute first class.

Rector R53

MILLAH MURRAH RICKY R45

Ricky was purchased by Arkle Farms at our 2021 sale, joining the same stable as Paratrooper in WA. He is a Spickler Powerpoint son from a massive volume Ascot Hallmark cow. We continue to use Ricky in the herd by AI, drawn to the easy fleshing, deep flanks and excellent skeletal and foot structure of the progeny.

Dam of Ricky R45, Flower N61

MILWILLAH RAMJET R1029

Ramjet is a Spickler Powerpoint son from one of the best cows in Milwillah's herd, by Reality. On inspection he is long and balanced with everything in the right place. We are delighted with the first calves from Ramjet. They fit right into our herd profile with super easy fleshing and skeletal structure. These are the first Ramjets we will offer, with calves expected for several seasons ahead. All of the Ramjet bulls appear in the yearling section and at least a couple of them have genuine stud sire claims. He is an exciting new line to enter the programme.

*Ramjet R1029
Right: Ramjet's dam, M Barunah L181*

MILLAH MURRAH QUARTZ Q29

Quartz gained prominence at our sale last year as the sire of the \$180,000 stud record priced yearling bull, Trigger T308. This followed a phenomenal performance at the cow sale where his seven daughters broke all records to average almost \$60,000. Purchased by Innesdale Angus in 2020 as the \$40,000, 3rd highest selling bull of that sale, Quartz is out of Flower N30, the highest valued female in the Australian Angus breed. He carries loads of the best genetics from yesteryear in his pedigree, with a four-generation paternal line featuring Kruse Time K400, BT Right Time 24J, Crusader of Stern and Hingaia 469. Quartz produces animals with impeccable structural design and phenotype.

Quartz Q29

TAIMATE ROY R38 (NZ)

I assessed Roy at Taimate in June 2022. Along with Coonamble's Craig Davis, we spent a lot of time with the bull. He is as the pictures suggest, thick, soft, and very easy fleshing, with an excellent disposition. The dam is the best cow in the Taimate herd, combining Matauri Reality and Coonamble Elevator in her ancestry. Roy's sire Taimate L38 carries a tremendous reputation as a female producer in NZ. This is the first group of Roy sons to sell in Australia. They provide an excellent outcross Kiwi bloodline. All appear in the yearling section. Lot 82 & 94 are particularly appealing.

*Top: Roy at 30 months
Lower left: Roy's dam, Taimate 1506
Lower right: Roy's sire, Taimate L38*

Sire of Lot 1, Rocketman R38

A terrific young sire prospect here who will pass the 800kg mark on sale day. He recorded the highest IMF scan of his 115 bull contemporary group. U87's dam, Flower P81, is working wonders. Her first three sons have sold to studs: a P15 son at \$46,000 to Bulliac in 2021; the \$160,000 sale topper, by Nectar, to Ascot & Clift Angus in 2022; and the \$90,000, 3rd high selling bull, by Quarter Pounder, to Stradbroke Angus in 2023. She is producing at the very elite end with all sires. Like his brothers, this fellow is an outstanding young sire.

The first Ricky son to sell. Ricky is resident sire at Arkle Angus in WA, who also purchased Paratrooper. A massive unit, U258 checked in at 756kg on June 19th, 42kg clear of the nearest rival in a 115 animal cohort. For sheer power and weight gain performance, U258 is a single generation herd changer.

Super stylish young sire with excellent calving ease credentials and plenty of actual growth performance. Universe U128 is an ideal all rounder for any role in the herd. The length and body shape of the Rocketman progeny is phenomenal. This is Q3's first son. Her first daughter sold for \$24,000. We retain her 2nd calf, a first calver and full sister to Universe.

The Rocketman progeny of both genders are quite outstanding. U127 is out of a great producing cow in Brenda K45. She has had five sons make sale grade to a top of \$28,000.

U86 combines two of the best animals from our programme in its 55 years, with former breed record holder Rocketman joining Flower N30, the highest valued female in breed history. Among her progeny achievements, N30 is the dam of AI sires Quartz Q29 and Sunstruck S207, as well as producing daughters to sell at \$80,000 & \$100,000. Universe U86 is a slick skinned, clean lined bull with huge presence. He is well suited for heifer mating if needed. ET brothers sell at Lots 1, 30, 34

Another magic pedigree here. Two breed record bulls (Paratrooper & Kingdom) behind a \$240,000 sire (Rembrandt) coupled with the daughter of a previous industry record priced yearling bull (Nugget) whose dam is by the fabled cow maker Hector. Dig deeper and Prue H112 briefly held the mantle as the highest priced cow in breed history. With that sort of pedigree you cannot get much more confident about the calves U101 will produce. Good all round option for use on heifers or cows as required. ET brother sells at Lot 46.

The first Paratrooper son through the ring this year and a bobby-dazzler to kick off the run. We have a full sister to U55, Prue T122 who ranks among the very best types of her year group. They come from the acclaimed Prue C48 line that produced H113 - the first cow in the breed to raise three \$40,000 sons, and U55's grand dam, Prue H112 - the former record priced cow of the breed. U55's only maternal brother sold for \$30,000 in 2021.

No surprise to see so much volume evident, with Rocketman x K400 combined. The grand dam is Brenda N72 who is Rector's dam, and they all trace back to the grand matriarch Brenda Y33. We lost U93's dam suddenly the day after weaning to an unknown cause. It was a significant loss, as I certainly rate this fellow to be a genuine stud sire prospect. Add to this that Q26's first son sold to Knowla last year for \$28,000 and she was starting to put an impressive progeny record together. Universe is a terrific all rounder with ideal heifer mating credentials. He is a seriously good bull.

Ulsterman U134 has been a favourite since early in the piece for his tremendous carcass shape and top line expression. He owns a brilliant pedigree with Klooney's dam, Prue H4 as grand dam. With data that supports his visual make up, U134 would achieve "next level" carcass quality joined to a line of Paratrooper cows.

Tremendous thickness and visual carcass displayed in the four flush brothers from dam Prue M352. She has an excellent natural calving record prior to becoming a donor and is the third generation to be used for ET. Her three natural sons to date have sold up to \$28,000 twice. ET brother sells next and at Lot 6 & Lot 43.

The classic Paratrooper x Kingdom pedigree never goes out of style. It has been one of the most prepotent combinations we have ever put together. The key to our programme is 55 years of phenotype selection that has never waived from the basics: Long, deep bodied, expressive over the top and wide behind. That policy of stacking generation upon generation of the same type, using plenty of sensible line breeding, has locked in the Millah Murrah style of cattle. This is what transmits to our long term clients' calves, and why they achieve premium results wherever they are sold. Full brothers sold for \$38,000 in the boom of 2021 and \$24,000 last year.

I love the physical make up of this calf and love his genetic background, which includes so many maternal icons of the breed. Hingaia 469, Crusader of Stern, Ythanbrae Henry VIII & Booroomooka Theo feature in earlier generations, with Nectar, Loch Up and Klooney now carving out stellar cow maker reputations. Rector is destined for similar standing. The dam's first calf sold for \$26,000 at our female sale last year to Mark & Ryan Schmitt. Ulsterman U89 brings no holes to the table and presents a myriad joining options.

Strong boned young sire here as is regularly the case with Rembrandt sons. U306 comes from a spectacular cow in Abigail M293. She was a prolific donor cow for us before selling to Gundungarra Angus at Robertson for \$40,000 last year. Among M293's many progeny achievements, she is the dam of Heart Angus' resident sire Rolls Royce who sold for \$110,000 in 2021, setting a new industry record price for a yearling bull at the time. Combining Rembrandt's powerful dam Abigail N60 and M293 in Usain U306's pedigree, expect massive volume replacement breeders as the result. ET brothers sell at Lots 48 & 49.

Superb visual carcass shape displayed by U105. His dam has had sons sell to \$55,000 during the boom. Paratrooper, Rembrandt, Kingdom, Klooney, Doc F159 in the mix - all superstar sires in their own right - with three generations of Ela donor cows underpinning them all. Extreme levels of multi-generational excellence. It does not happen overnight and helps to explain why herd improvement for our clients is so fast.

The Paratrooper x Kingdom combination is so well proven and has worked very well over the years with N10. A full brother to U92 fetched \$40,000 to Macada in 2021. He would be a genetic contributor to their fantastic grading results in 2023 that saw a 62.57 MSA index average for 66 steers, 100% grass fed, at 15 months of age. Their next consignment of 68 steers in March stepped it up to 62.77.

Like the previous bull, U279 carries a highly proven pedigree mix. Paratrooper x Hector always delivers exceptional muscling, with vigorous early growth before the brakes are applied at maturity. Breedplan has had enough U279 siblings through the system to get the growth curve estimates spot on here. A full brother sold for \$18,000 at our sale last year. ET brother sells at Lot 54.

AMFU,CAFU,DDFU,NHFU

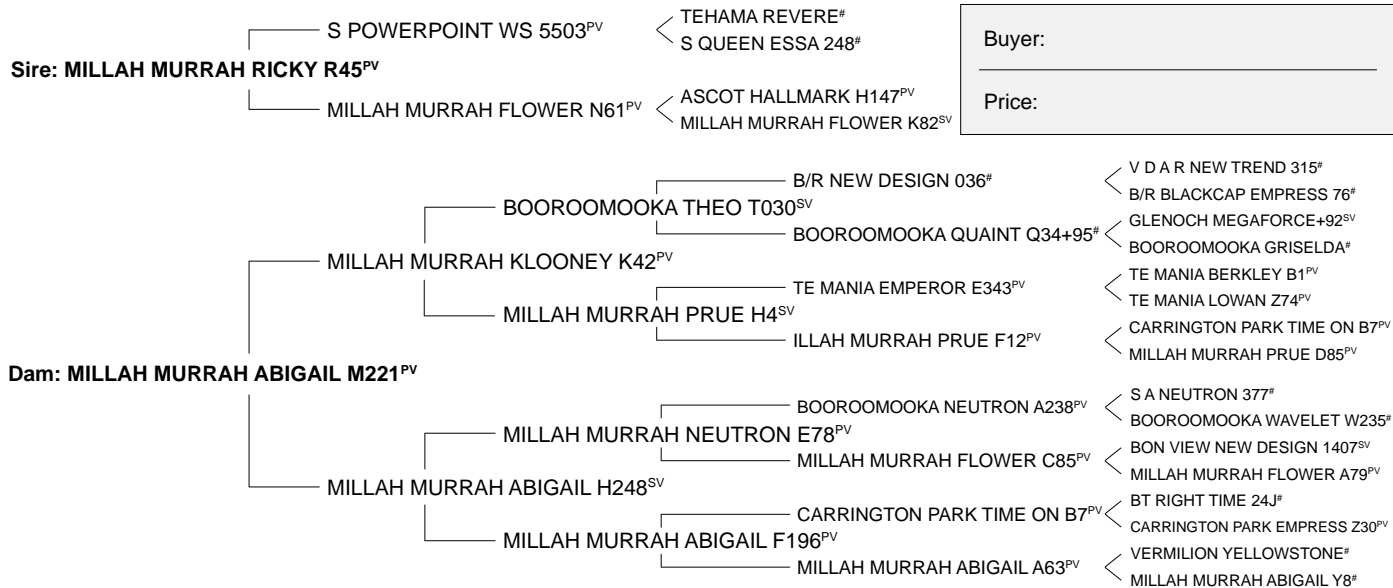

A maternal sister sold for \$24,000 and a maternal brother fetched \$14,000 at our sales last year. We don't print the scores for bulls that pass the 70% threshold, but the negative scrotal EBV warrants stating that U181 shot the lights out, testing at 83% viable sperm morphology at 14 months of age. As the doyen of bull reproduction Ian Moreland once said, in his own inimitable fashion "there are only three kinds of nuts: too small to produce, so big they get injured and fertile ones". Phenotypically Ulsterman is a ripper, as is his dam. I love the pedigree combination as a suggested mating option for direct Paratrooper daughters. U181 is suitable to use on heifers or cows, whatever the job required.

AMFU,CAFU,DDFU,NHFU

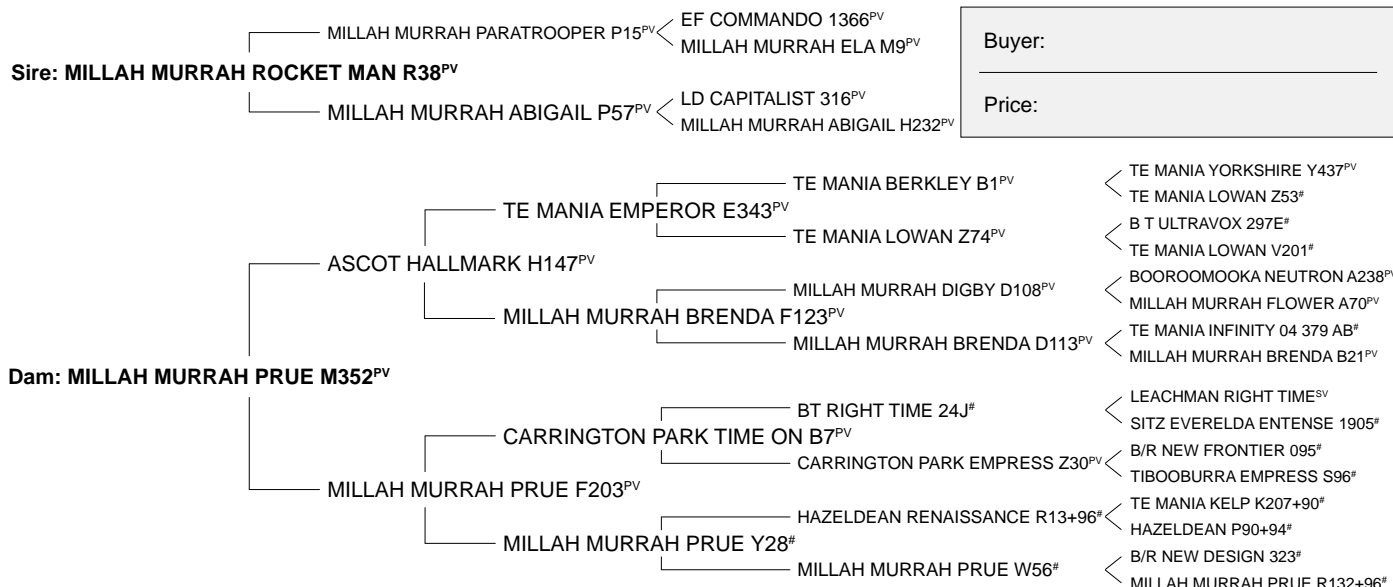

The dam of Lot 42 has been a prolific donor cow for us before selling last year for \$22,000. She has a superb maternal lineage that combines the matriarch cows Flower G20 & S110 with Abigail S104 on the bottom side of the pedigree, and the famed Prue H4 on the top side. Flower G20 & S110 come into the equation on U254's sire side as well. M221 produced 24 calves for us and a whopping \$417,000 in gross progeny sales before we sold her. There's no doubting the maternal strength behind young Ricky! He'll suit any role in the herd and is certainly a good heifer mating alternative.

During the craziness that was the Australian beef industry of 2021 & 2022, 16 bulls bred with the same genetic combination of Paratrooper mated to a Klooney daughter sold to average \$52,000 - a figure that remains very hard to fathom! While it certainly does not reflect the price we expect for this fellow, it does indicate the power of the genetic combination. The Paratrooper/Klooney progeny are exceptional. Unify U185 is an excellent choice as a heifer mating sire.

We haven't bred many better types of cow than the dam of U184. Abigail N162 is the 5th consecutive generation of her line - back to the matriarch S104 - to be used in our donor programme. She has a stellar record including her first calf who was the \$40,000 3rd high selling bull at our 2020 sale. Four full brothers to U184 have sold to average the same figure. Like them all, Unify U184 is early maturing, thick topped and robust. He will make magnificent replacement females.

Hard to imagine a better credentialled pedigree, with two breed record bulls (Paratrooper & Kingdom) behind a \$240,000 sire (Rembrandt) coupled with the daughter of a previous industry record priced yearling bull (Nugget), whose dam is by the fabled cow maker Hector. Dig deeper and Prue H112 briefly held the mantle as the highest priced cow in breed history. With that sort of heritage you cannot be more confident about the calves U40 will produce. Earlier maturing than his ET brother that sells at Lot 18. U40 is a cracking type.

The \$240,000 Rembrandt joins the dam of the bull that pipped him for the breed record in 2022, Rocketman's mum, Abigail P57. U126 exhibits the standup presence we'd expect from these genetics, with hard to fault phenotype and structure. He will make superb breeders. Scar on near eye.

U304 & U310 (who sells next) come from a spectacular cow in Abigail M293. She was a prolific donor cow for us before selling to Gundungarra Angus at Robertson for \$40,000 last year. Among M293's many progeny achievements, she is the dam of Heart Angus' resident sire Rolls Royce who sold for \$110,000 in 2021, setting a new industry record price for a yearling bull at the time. Combining Rembrandt's powerful dam Abigail N60 and M293 in the bulls' pedigree, expect massive volume replacement breeders as the result. ET brothers sell next and at Lot 36.

AMFU,CAFU,DDFU,NHFU

Tremendously stylish bull as is always the case with the Quartz progeny. Behind U302's 3rd generation donor dam is Prue M276 who was the \$52,000 Lot 1 cow at our female sale last year. Her parents are the legendary Kingdom, and Klooney's mother Prue H4. With Flower N30 as the dam of Quartz, U302's genetics are as heavily stacked for maternal excellence as anything we have seen. He is hard to look past as a front paddock cow maker.

We love the Rembrandt x Nugget phenotype outcome. They are typically moderate, easy keeping, no fuss cattle that are made right. A heifer's calf here with magnificent carcase shape. He is a solid choice as a heifer mating option. The grand dam of U242 is the mother of the previous bull through the ring. They'd make a good joining pair.

A heifer's calf once again, descended from the matriarch Brenda Y33 line. The bulls in this pen are hard to tell apart. They are early maturing, thick and very easy doing. Independently measured with a 38cm scrotal size, and 82% sperm morphology at 16 months, it doesn't align with the EBV. Bomb proof heifer bull here.

There is some superb breeding underwriting U36's ancestral claims. His great grand dam, Prue H4, is Klooney's dam. His grand dam, Prue P88 is breeding beautifully, giving us a \$55,000 son and the \$30,000 Prue R3 (dam of this bull), as her first two calves. Matching Rembrandt with the Nugget line was a "Breeding 101" decision and once again has created a beaut style of bull here. U36 is so soft, dense and easy keeping. He will make a stay-in-bed heifer joining option.

The earliest Rector daughters in production are so impressive. Now seeing widespread uptake as an AI sire through ABS, he will be a big maternal enhancer for the breed generally. Rector adds plenty of natural carcase shape as well. U194's damsides is brim full with show stopping cows from the recent past. His dam has had sons sell to \$20,000. U194 is suitable for cow mating only.

U19 is from a huge barrelled young cow descended from the Brenda Y33 line, who sold last year for \$30,000. Her first calf sold at the bull sale, later in the year, for the same figure. U19 is thick set, with an exceptional muscle pattern. He will suit all roles in the herd and certainly presents as a high confidence heifer mating proposition.

Born at 29kg, U2 was the 2nd lightest born calf of his contemporaries. With a top 1% gestation length and a solid direct calving ease estimate, expect these factors to offset the moderate birth weight and give sound results on heifers. U2 has plenty of grunt too, as indicated by the EBV's. We expect him to be approaching the 750kg mark at sale time. Heifer's calf. Scarring on near side eye.

This bloke and the bull to follow will also give the 1000kg mark a nudge. That is not our objective, and we'd probably sooner leave the heavy weight bull chase to others. But you have to admire these boys. They are so well made, on tremendous feet and legs and are handling their scale with ease. For producers seeking a quantum lift in weaner performance they are hard to overlook. T333's dam sold for \$20,000 at our cow sale last year. Her only other son fetched \$38,000 in 2022.

A rich vein of the catalogue with another exceptionally well made sire here. He owns the time tested Paratrooper x Kingdom pedigree. It is one for the ages. The dam has a very strong production record with three sons selling previously at \$37,000 average. This includes the full brother to T460 for \$45,000 as a yearling in the heated 2022 market. T460 displays a beautiful soft finish and hair quality, with a big hip and plenty of scale about him. He is out of the top drawer.

Some class in the ancestry of this bull. His grand dam, Brenda N8 is the mother of Quixote who topped our 2020 sale. Her lineage tracks back to Brenda H49 who raised Loch Up, then down three more generations to the matriarch Brenda Y33. Add Kruse Time, Rocketman and their forebears to the equation and you have a stellar set of genes behind T253.

Similar breeding to the previous bull, doubling down on mid-section capacity and back end volume with Rocketman and Kruse Time combined. The dam, Honey M346, has had sons sell to \$35,000, for Sovereign S371 who we have used by AI in the stud. Her grand dam is Honey H159 who raised the popular AI sire and 2018 sale topper, Nugget N266. With his top 1% growth estimates, expect massive growth performance from the progeny of T478.

Tremendous thickness across the top line, down through the rear end. Rector and Paratrooper always transmit these characteristics and it's something Coonamble Hector delivered in spades. He features twice, high in Thirsty T324's pedigree. The full brother to Thirsty's dam is Rolls Royce R275 who sold for \$110,000 in 2021, and at the time was the highest valued yearling bull in the industry. T324 is a moderate framed bull, chock full of red meat. He will breed huge early life growth performance into his calves.

Full brother to Trigger T308, who set a new yearling record price of \$180,000 for us last year, to a syndicate lead by ABS. We have used Trigger extensively in our herd. I saw him on centre at TLG, with Ross Milne in June, and could not have been happier. A better set of feet you will not see. And he has kept his shape very well, despite leading the sedentary life of a semen sire for the past 12 months. T332 is similarly a great type, displaying the classic Quartz style, and while he pulls up short of Trigger on the data side, if you are a lover of beautiful Angus cows, he will be very hard to overlook.

Boy this fella is thick, and little wonder when you consider the layers of muscle power in his pedigree: Paratrooper, Capitalist, Rocketman, Loch Up and Hector. That stacking of type into one natural insemination package guarantees a similar progeny outcome. Sale topping weaners are a certainty. The dam is a spectacular cow and becoming a mainstay of our ET programme. Her first daughter sold for \$24,000 and a yearling full brother to this bull fetched \$16,000 last year.

First of the true yearlings into the ring. We select the yearlings with a leaning to calving ease, given their natural suitability for heifer mating. However, in each cohort there are a few whose maturity and early life growth performance demands inclusion in the sale as a yearling, despite being more suited to the cow role. Usain U332 is one such bull. At scanning on July 12th he was the first bull we have bred to break the 600kg barrier before 365 days of age (608kg). That power comes from his incredible length, breadth and depth proportions. He is quite a beast.

Traits Observed: BWT, Genomics

AMFU, CAFU, DDFU, NHFU

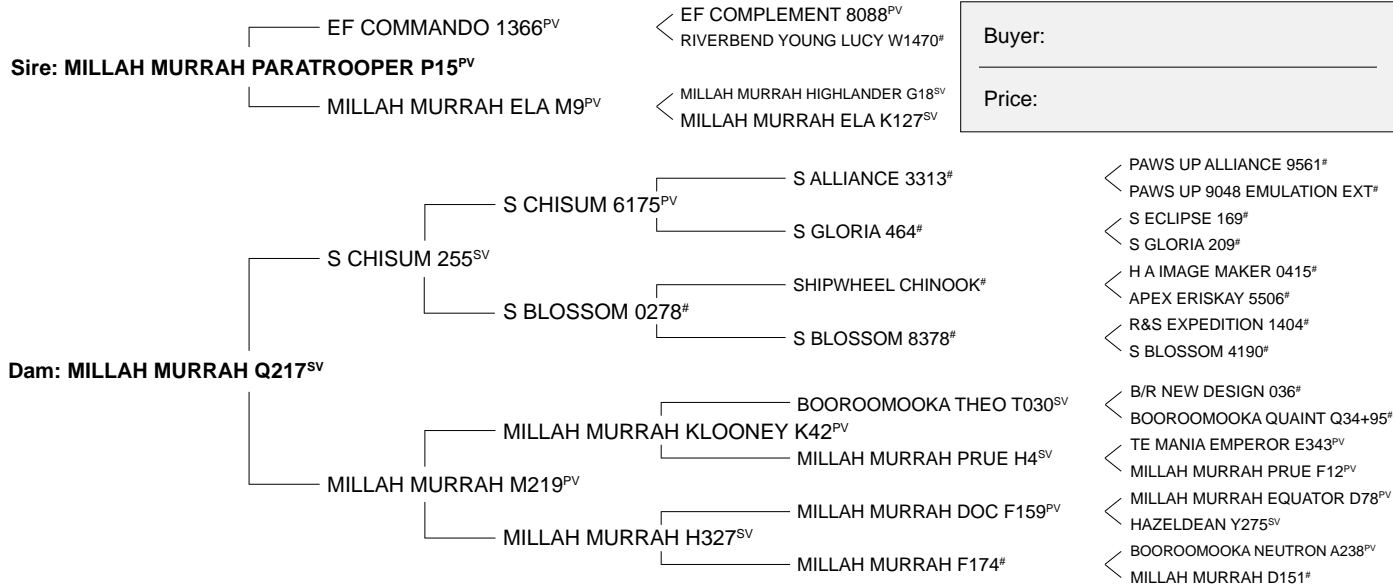

First son of the New Zealand sire Taimate Roy to sell. Considered from any angle, U331 has tremendous appeal. Exhibiting plenty of frame and scope, weight wise he would be the bell ringer, if not for the bull that enters the ring before him. The pedigree is superb on the maternal side, with the acclaimed Flower N30 as grand dam, and renowned female maker Nugget as the dam's sire. The data balance is spot on too. Above all, with his natural softness, strong head, carried high, and lovely disposition, U331 has the aura of a real stud sire. He's an exciting prospect.

U436 muscled his way into the front pen of yearlings, literally. He exhibits the superb Paratrooper early carcass expression that's so valuable at weaner sale time. Born at 38kg, with a moderate, genomically enhanced birth EBV and short gestation, I'd be happy to see him sampled on heifers. Being close to 650kg at sale time, he'll also be primed to handle a full complement of young cows. Owners choice on that.

A similar story to the previous bull, U346 will punch Paratrooper's tremendous early weight and shape into the progeny that makes for sale topping weaners. He will give 650kg a nudge by sale time, raring to work on a mob of 1st or 2nd calvers. Yearling bulls are one of the industry's great profit opportunities. When they are developed like this, what is the point holding them back?

First of the Ramjets to sell here. We love their softness and excellent carcass shape. This fellow is a prime example, with his beautiful easy fleshing and depth of ham. U352's dam is descended from the great Prue C48 line, through the \$52,000 former breed record holder H112. All the bulls in the first pen of yearlings were over 500kg on July 12th, and will pass 600kg by sale day. They are more than capable of handling a standard mob size (35-40) of 1st or 2nd calvers right away. ET Brothers present in the same pen, selling at Lots 88 & 93.

Exciting prospect here and something of a one off. We love the dam, Prue N156. She would have been a donor mainstay but just won't respond to conventional ET. N156 comes from the fabulous Prue C48 line. Her mother, Prue H113, was the first Angus cow in Australia to raise three sons that sold for \$40,000 or better. When considering a bull's stud sire merits, they must check off the non-negotiables. For Ramjet U357, consider structure & type. Tick, tick. Secondly, maternal heritage. Tick again (we love the Kingdom factor). Finally we consider their performance, both actual and estimated, and this boy brings plenty to the plate. With a lovely gentle disposition, U357 offers an excellent outcross opportunity with myriad joining options.

Another top prospect. The dam of this bull, Brenda S38, is very closely related to Rector. They share the same sire (Nectar), while S38's grand dam, Brenda N72, doubles in the role of Rector's Mum. For S38, the capacity of Kruse Time K400 is added to the mix. With Ramjet on top, that's generation after generation after generation of similar maturity, doing ease and thickness and virtually guarantees the influence U353 will have on his progeny. An excellent calving ease option, with Paratrooper heifers high on the list of ideal bloodlines. This is another sire that would not be out of place serving in a stud role. Slight scar near side eye.

Stud sire territory again. There is so much confidence to be gained when you observe young Ramjet's U356's superb brothers in the same pen. They sell at Lots 85 & 93. U356 does everything right. Beautiful phenotype and skeletal structure, plus fantastic maternal heritage. Not too much out of place with the data. This fellow used over a mob of Paratrooper heifers would set a new benchmark for body shape and modern Angus breed type.

The sire of this calf was right at the top of my favourites list in 2021. He sailed under the radar, as Rocketman, Rembrandt & Rolls Royce took the limelight. He was picked up by Anthony Skinner's Macada Pastoral. We kept semen. With so much depth, flowing from the chest, through the mid piece all the way into the hams, U389 is another beautiful example of the breed. His daughters will be special.

Magnificent young sire from a mating that has produced the goods several times before. During the crazy spring of 2022, three yearling full brothers sold at \$110,000, \$50,000 & \$45,000. Things have settled down since then, and it is no guide on what he might make, but U391 is every bit as good as them. Like his brothers, Unify U391 possesses an extremely appealing phenotype, with ample top line muscle expression, huge butt, and lovely soft finish. With top 7% gestation length and moderation for the other relevant traits, U391 is a strong heifer mating option in year one and a herd foundation maker for the future.

High quality outcross pedigree here. The dam line is very well performed. Q67 herself has had sons sell to \$50,000. Her mother, Brenda N8 raised the 2020 sale topper, Quixote Q96. Two generations behind that, Brenda H49 birthed Loch Up, the 2016 sale topper. And three generations further back is the grand matriarch cow, Brenda Y33. On the top side, Ramjet comes from one of the highest performing female lines at Milwillah. These magnificent bloodlines culminate in U325, who certainly does the royal lineage justice. He is thick as a brick, with perfect structure. The data set is sharp too. He is ideal as a heifer mating option.

The 3rd of three outstanding ET Brothers. The others present in the same pen, selling at Lots 85 & 88. U344 pressed the scales at 542kg on July 12th. All three brothers were within 10kg of each other. Like the other two, U344 displays irresistible fleshing and softness and overall breed character. He will enhance any bloodline, but with excellent heifer mating credentials, U344 strikes as a superb fit for anyone with direct Paratrooper heifers to join. Slight scar near side eye.

Dam's previous five sons have made the auction to average \$27,000. She has raised another better in Unify U410. He weighed 552kg on the 12th of July, despite birthing at a miserly 31kg. The curve bending data certainly backs the actual measurements here. U410 is an excellent heifer joining option but offers a whole lot more choices for the herd if needed.

Amazing pedigree. The grand sires and maternal great grand sires of U440 all topped our past sales: Kingdom (2015: \$150,000 - breed record), Loch Up (2016: \$85,000 - breed high for the year), Paratrooper (2019: \$160,000 - breed record) & Quixote (2020: \$60,000). And throw in Rembrandt as the sire. It is a fantastic illustration of the years of elite selection behind the bulls we present. Huge growth curve estimates here. A heifer's calf, the data says U440 should be OK on heifers, but expect him to grow out into a big unit.

Doubly descended from to the 2012 Sale topper Highlander G18. I credit his influence, as much as any ancestor, with Paratrooper and his progeny's physical carcass shape. The skin on this fellow is superb. Good heifer selection.

Love this pedigree. U444 stems from the matriarch Flower cows G20 & Y141 through a superb cow in C43. The maternal grand sire, Henry VIII is an old favourite of mine. He left some of the most efficient cows I have seen. They made a mockery of the fat EBV's as a reliable predictor of mature cow doing ease - something the latest research is starting to support. A young sire here with so much physical appeal to back up the rich pedigree. He will be ideal in the heifer mating role.

Something different here. The dam is a completely imported embryo from a cow we bought in the US with Nanni DiGiorgio in 2018. U351 possesses exceptional top line thickness. Like so many of the yearlings he would suit heifers, but carries sufficient scale to work a mob of two or three year old cows in his first season if desired.

An outstanding calf here, certainly worthy of stud consideration. We picked up old Kerry D8 at the Woodruff's dispersal sale in 2018. She has been a marvellous addition, still suckling a calf at age 16. We are most excited by her daughter R205, whose Rembrandt "T drop" bull calf is retained as a stud sire. Unify U348 is a beautiful young bull to inspect. He owns flawless skeletal structure, comes with compelling maternal backing and presents an extremely handy data set. He is an excellent heifer joining alternative.

U330 is a beautiful type that catches the eye every time. He displays incredible mid section volume and a massive butt for such a young bull. He was born 269 days post insemination, which feeds into the top 1% gestation EBV. I'd be comfortable to see him used on heifers in his first season, although at around 600kg on sale day, he is capable of handling a full quota of young cows if need be.

I love the muscle shape that the Paratrooper x Nectar mating produces. This fellow is bred in the pink, with a dam line descended from arguably the most influential pair of cows in herd history, Flower G20 & S110. U394's grand dam is a special type, who had six months in the donor pen and will likely return. The dam, R267, is also rated very highly. She too has been used for ET. R267's full brother fetched \$26,000 as a yearling in 2021. Her first calf, by Jupiter, sold as a yearling for \$14,000 last year. U394's ET brother sells in the same pen, at Lot 115. A "no need to check" heifer mating choice.

AMFU,CAFU,DDFU,NHFU

Another outcross pedigree, with first season access to Roy. Genetics is never a straight line equation, but we raise the chances by mating like with like, as is the case here with Roy and Milestone combining. The dam's first son fetched \$18,000 as a yearling in 2023. Very slight scar on both eyes. It does not affect his disposition. U416 is an ideal bull for heifer mating.

There's some outstanding progeny performance among the siblings and ancestry of this bull. His dam combines the highest selling bull in Australia for 2016, Loch Up, with Kingdom's mother, Flower G41. P197's first son was a star, fetching \$30,000 as a yearling in 2021. Her second calf commanded a price tag of \$45,000 as a PTIC heifer last year. Her 3rd calf made \$20,000 as a two year old last year, while another son brought \$26,000 as a yearling at the same sale, with semen retained by us. With Rembrandt, Paratrooper and Kingdom on the top side, it is a wonderfully strong pedigree. U522 scanned 7.4 for IMF at 11 months to be the equal top in his cohort. He is a stellar heifer mating option.

Fantastic pedigree behind this bull and his ET brothers that sell as the next two Lots, and at Lot 2. Their sire, Rector has been contracted by ABS in the past 12 months for global semen sales. On the dam side, R118 is an exceptional young cow, purchased by Ascot Angus for \$80,000 last year. Her dam is the magnificent Flower N30. A half share of her embryo production sold for \$140,000 to be the highlight of our female sale last year. Her two naturally raised sons, Quartz and Sunstruck are semen sires. Another daughter sold for \$100,000 last year. Ulsterman U154 is a tremendous animal from the very core of our programme. Suitable for use on heifers if needed. Slight scar near side eye.

LOT 122: MILLAH MURRAH UNIFY U210^{PV} IDENT: NMM23U210 DOB: 21/3/2023 HBR 

Traits Observed: BWT,200WT,400WT,SC,Scan(EMA,Rib,Rump,IMF),DOC,Genomics

AMFU,CAFU,DDFU,NHFU

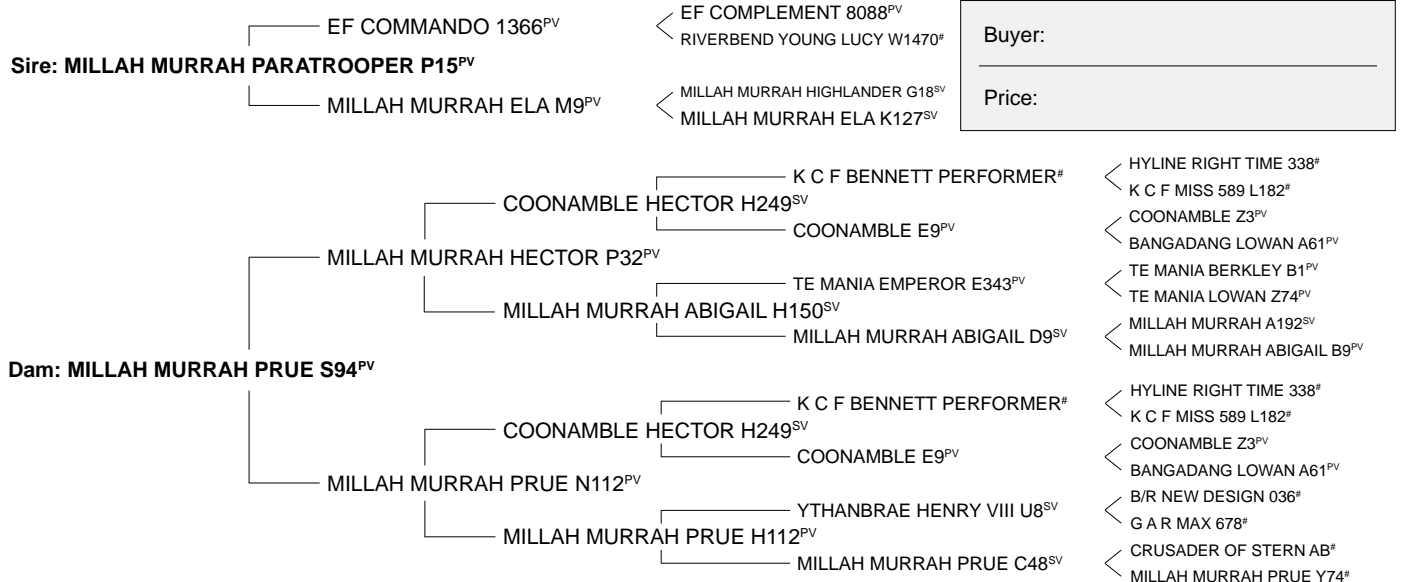

Some impressive credentials to bring in at Lot 122! U210 is an ET full brother to the \$280,000 former record priced bull of the breed Rocketman R38, who has so many outstanding sons in this sale. Another brother fetched \$32,000 last year. U210 displays the exceptional length of his brother, and while not owning quite the extreme volume of hindquarter, he still packs a solid punch in the pants. Excellent heifer mating credentials as well. Slight scar near side eye.

AMFU,CAFU,DDFU,NHFU

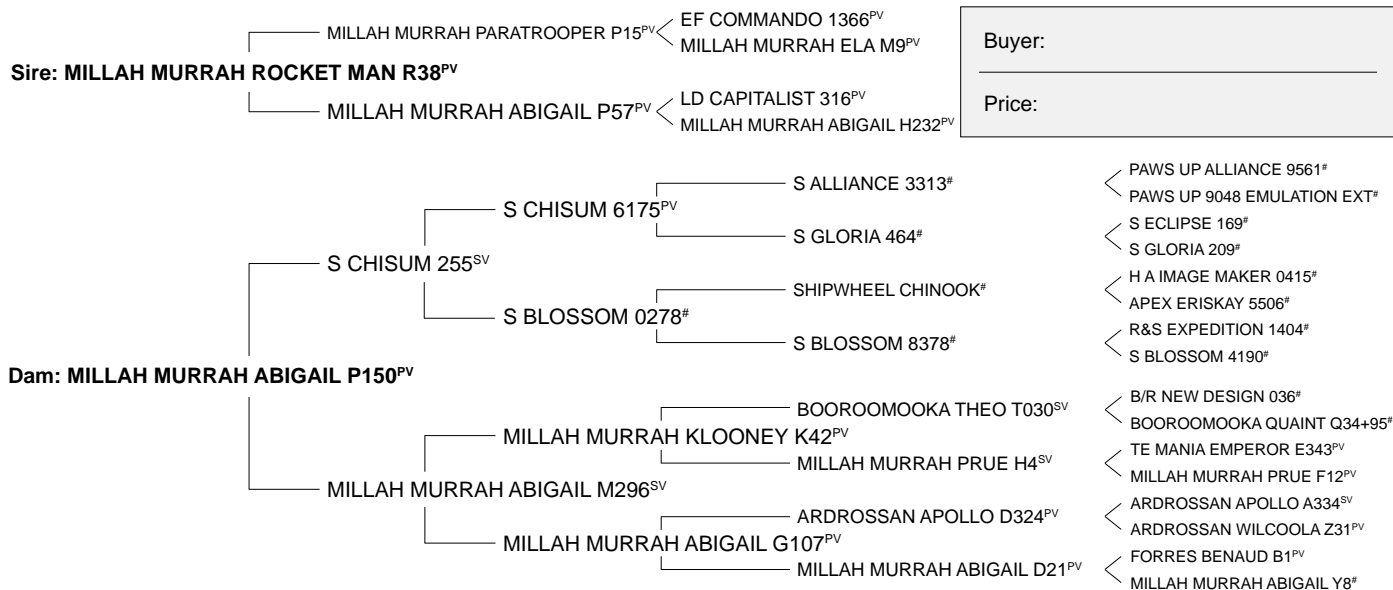

Long, smooth shouldered bull from the Prue C48 line, through the former record priced cow of the breed, Prue H112. Shortest 3% gestation length predictions, moderate birth weight and a clean front end set up should result in good results if he is used in a heifer mating capacity.

AMFU,CAFU,DDFU,NHFU

First of a phenomenal pen of bulls. They are by and large the youngest bulls from the Autumn drop, and a source of great pride to present as the last of the offering. The dam of Lot 127 sold for \$32,000 last year, with a stellar progeny record that includes four sons to average \$36,500. She has two ET sons by Ricky R45 in this sale, at Lots 13 & 80, and another son by Rocketman in the same pen as this bull, at Lot 132. Her phenotypic prepotence is very apparent if you look across the progeny by the three different fathers. This is a beaut young sire.

A 3/4 brother to the bull that sells two slots prior, at Lot 126. U217 descends from the same Flower G20/S110 line, and carries the same four lines of Hingaia 469 in his extended pedigree. You can see the 469 influence manifested in U217's tremendous bone and robust conformation. It serves to illustrate the reliability improvement we get from years of designed line breeding - what stud breeders mean when we talk about depth of breeding. Slight scar near side eye.

The dam of U212 is a peach. She sold last year to Tivoli Angus for \$90,000. Great grand dam on both sides of the pedigree is the highest valued cow in the Australian Angus breed, Flower N30. She descends from the legendary Flower G20 line, through her fellow matriarch daughter Y141. The bottom side of the sire's pedigree descends from Flower G20 as well, this time through her other matriarch daughter S110. Adding to U212's appeal is the fact that the full sister is unequivocally my favourite heifer in her age group. It is true heart of the herd stuff and hard to conceive of a stronger maternal line. Ideal heifer mating option, not without stud claims. Slight scar near side eye.

Attention Buyer

Animal details included in this catalogue, including but not limited to pedigree, DNA information, Estimated Breeding Values (EBVs) and Index values, are based on information provided by the breeder or owner of the animal. Whilst all reasonable care has been taken to ensure that the information provided in this catalogue was correct at the time of publication, Angus Australia will assume no responsibility for the accuracy or completeness of the information, nor for the outcome (including consequential loss) of any action taken based on this information.

Parent Verification Suffixes

The animals listed within this catalogue including its pedigree, are displaying a Parent Verification Suffix which indicates the DNA parent verification status that has been conducted on the animal. The Parent Verification Suffixes that will appear at the end of each animal's name.

The suffix displayed at the end of each animal's name indicates the DNA parentage verification that has been conducted by Angus Australia.

PV: both parents have been verified by DNA.

SV: the sire has been verified by DNA.

DV: the dam has been verified by DNA.

#: DNA verification has not been conducted.

E: DNA verification has identified that the sire and/or dam may possibly be incorrect, but this cannot be confirmed conclusively.

Privacy Information

In order for Angus Australia to process the transfer of a registered animal in this catalogue, the vendor will need to provide certain information to Angus Australia and the buyer consents to the collection and disclosure of that information by Angus Australia in certain circumstances. If the buyer does not wish for his or her information to be stored and disclosed by Angus Australia, the buyer must complete the form included below and forward it to Angus Australia.
